

LAB 01: GitHub Identity, Student Portal Registration, and Ubuntu Server Installation

Submitted by:

Wania Zainab

Submitted To:

Engr. Waqas Saleem

Reg No:

FA24B1-SE-017

Github Username:

waniazainab

Department:

Software Engineering (A)

Course:

Cloud Computing

Course Code:

SE-665

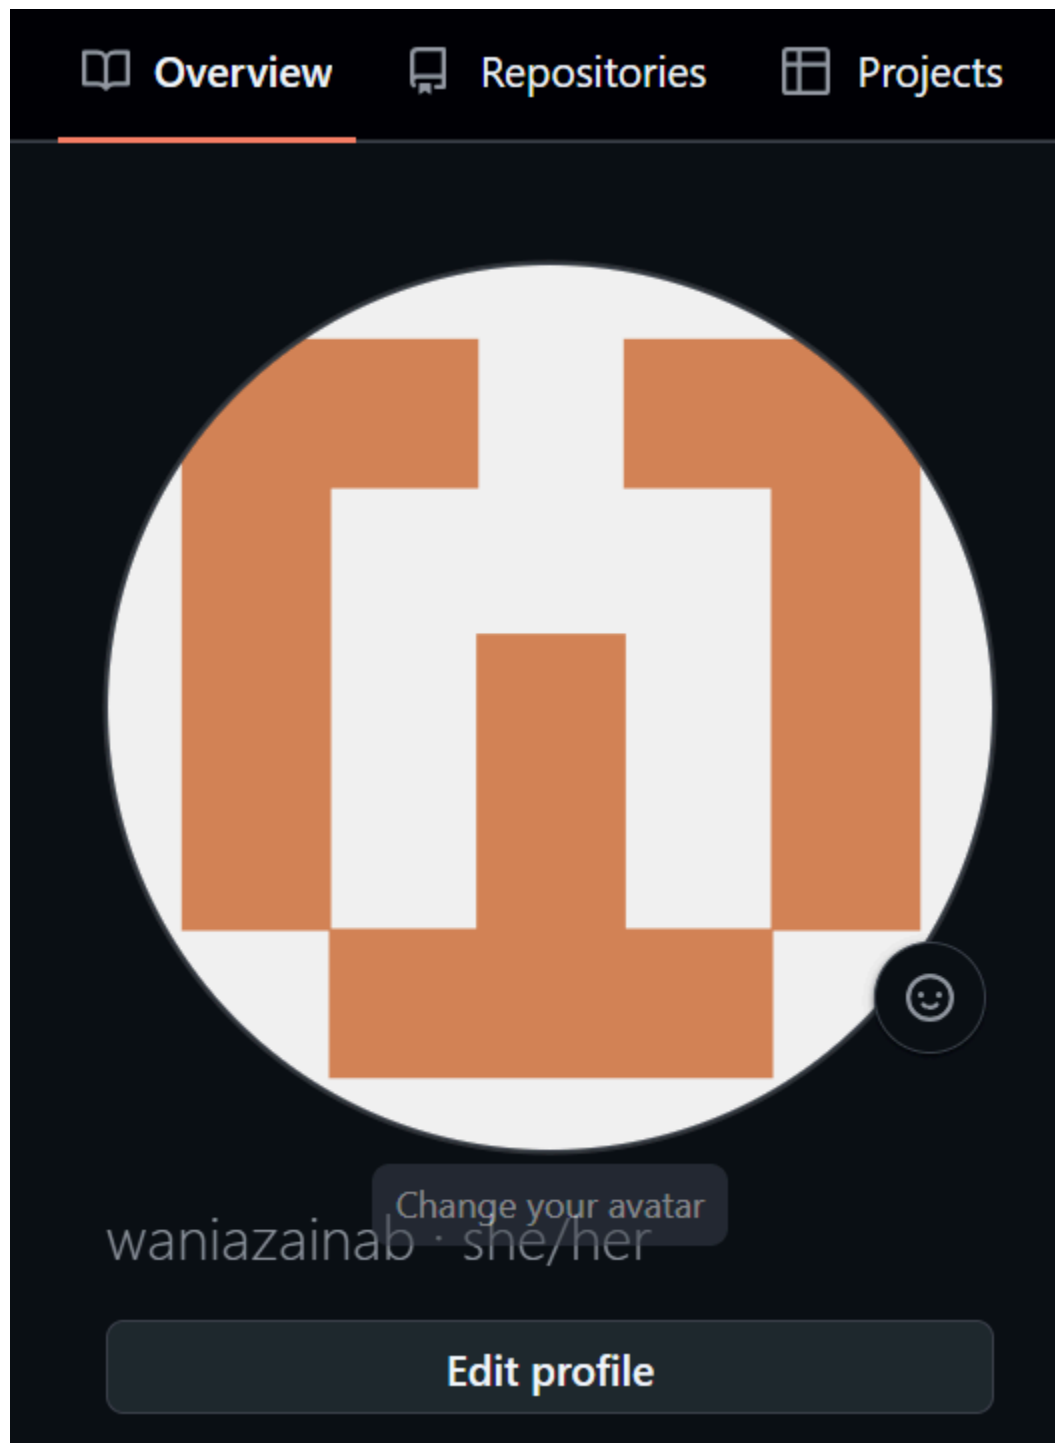

University:

Fatima Jinnah Women University

Due Date:

21st June, 2026

github_profile.png

Here I have set up my github profile by linking it to my Personal Google Gmail and named my profile as waniazainab as per requirements.

Github_actual_name:

Wania Zainab

waniazainab · she/her

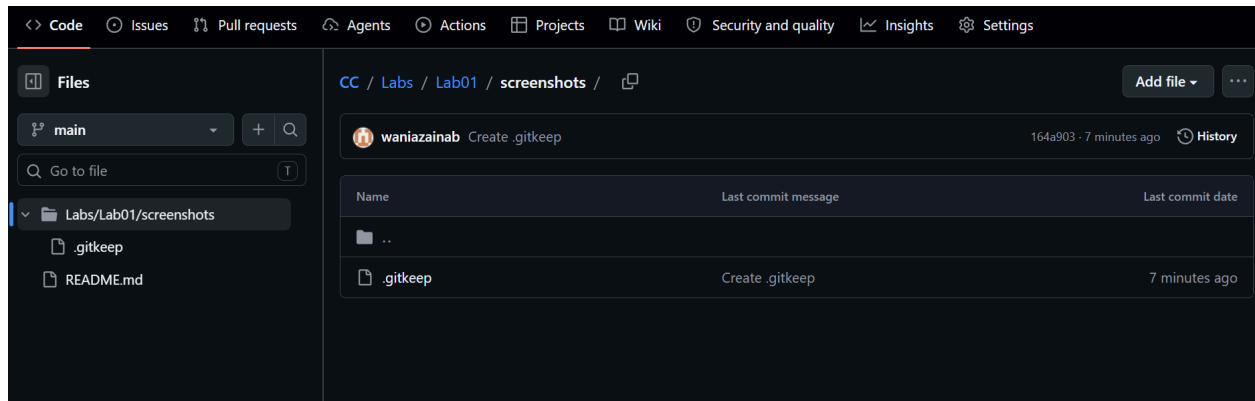

[Edit profile](#)

 [in/wania-z-6a4417341](https://www.linkedin.com/in/wania-z-6a4417341)

 [https://www.instagram.com/wania_zainab9?
igsh=bWY0bXhzd2ozZDln](https://www.instagram.com/wania_zainab9?igsh=bWY0bXhzd2ozZDln)

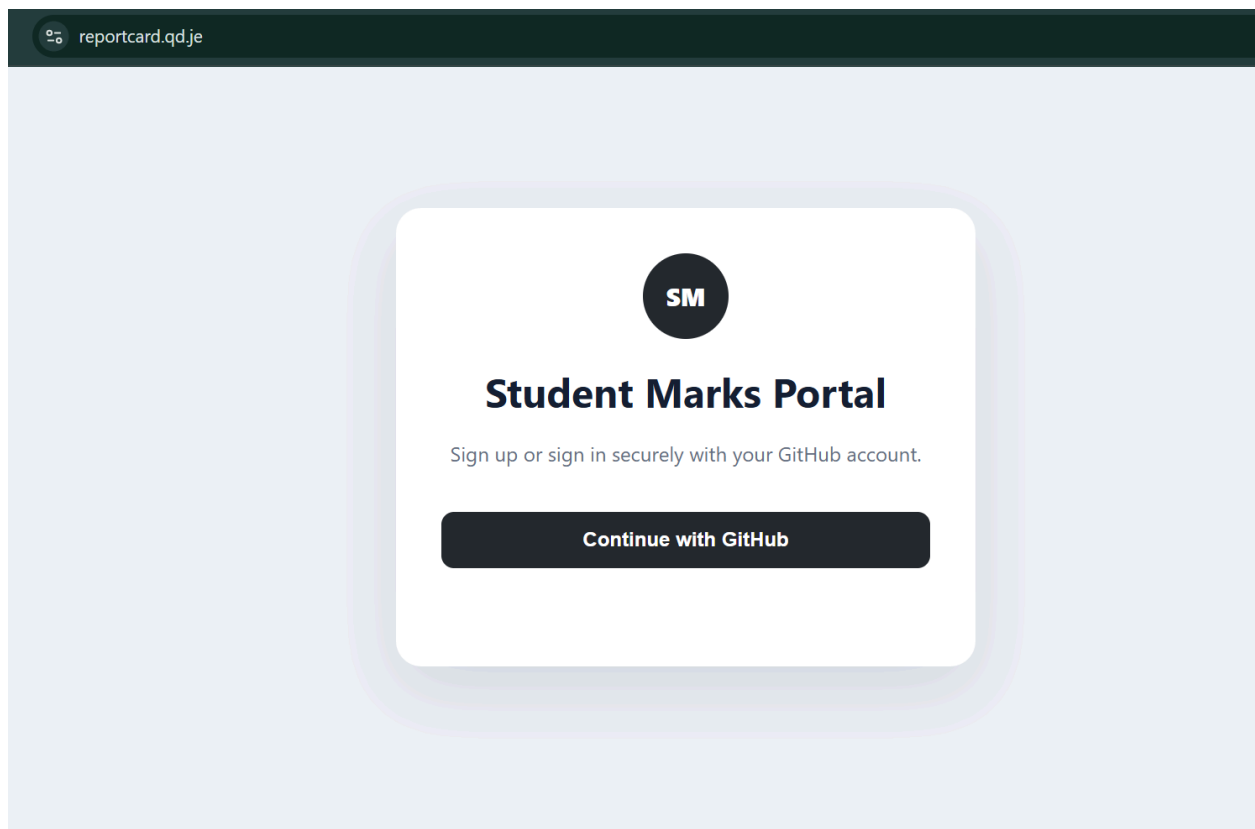

This screenshot shows that i have set my name and added my social media links in github by modifying my existing profile.

lab01_folder_structure.png

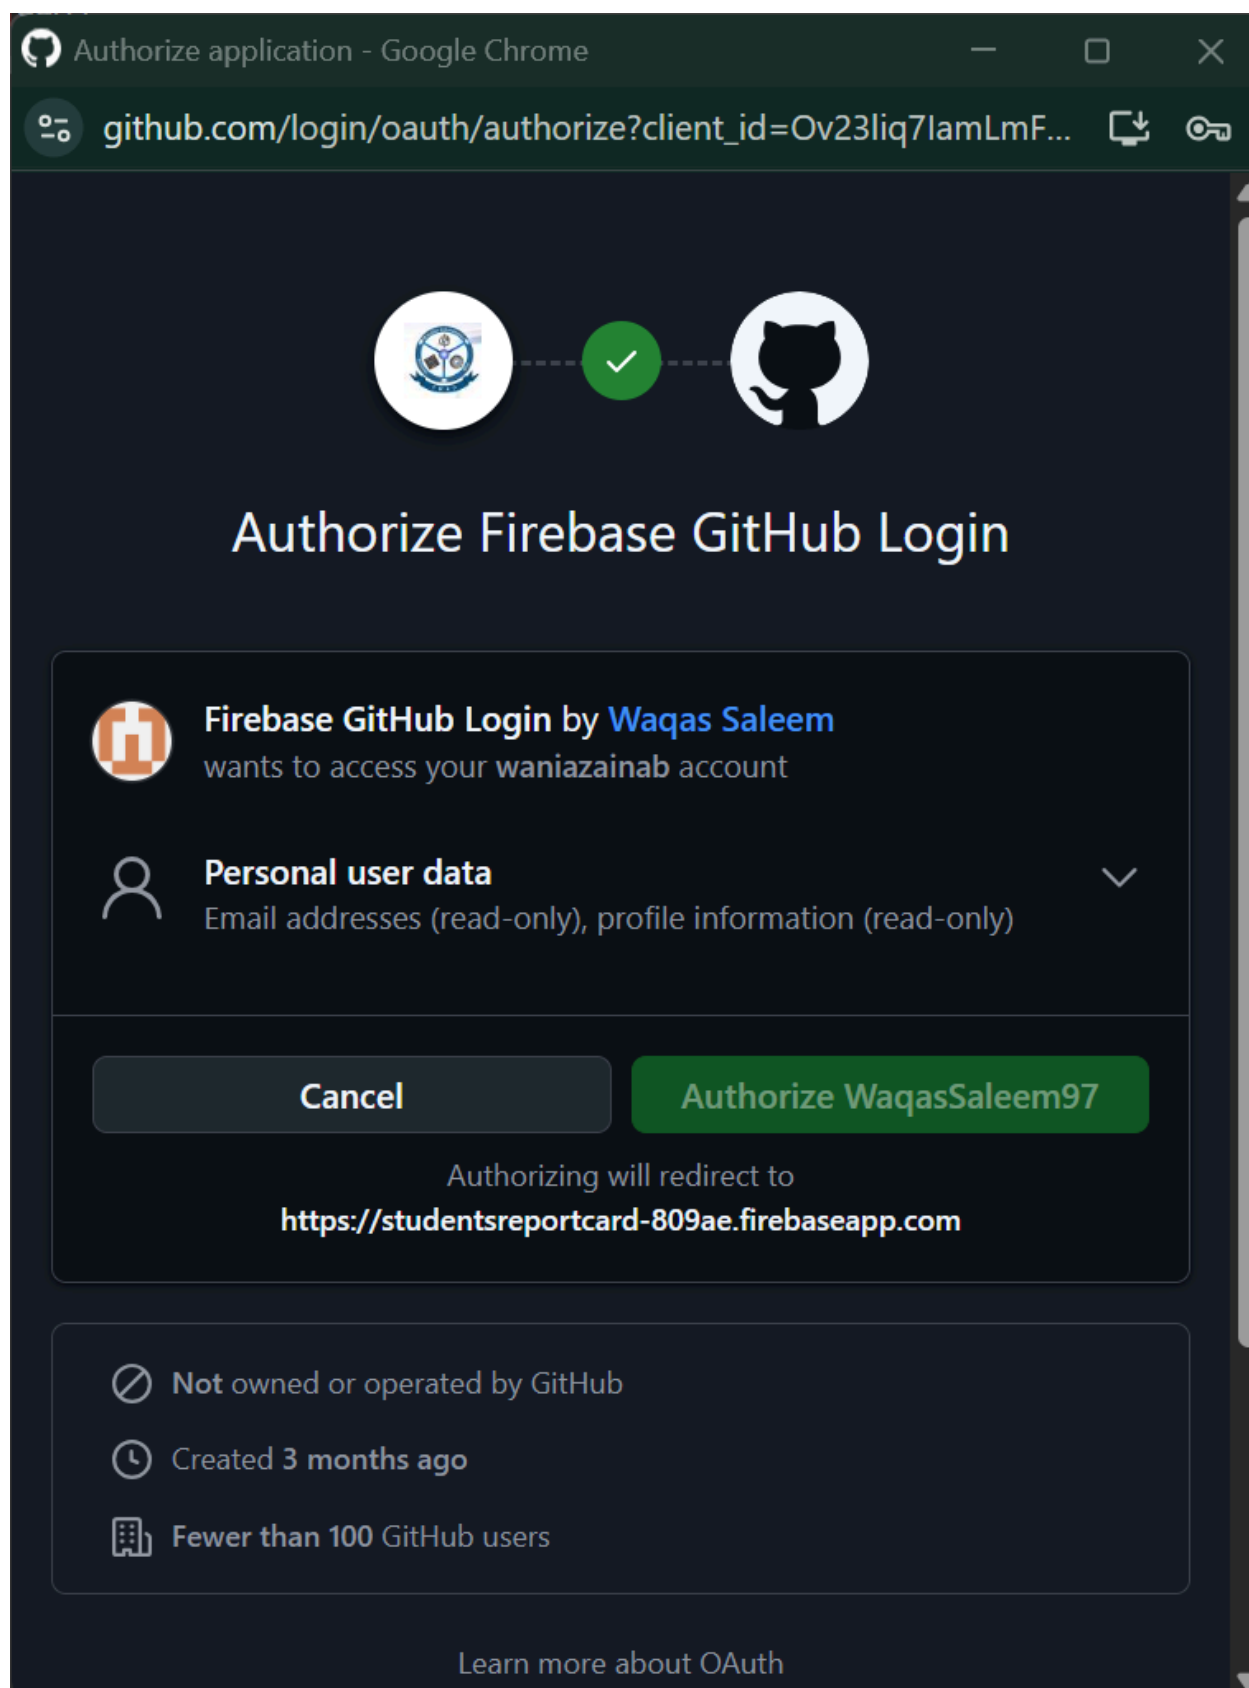

After creating my profile, I move to the next step by creating a repository named CC containing different files and folders.

Portal_login_page.png:

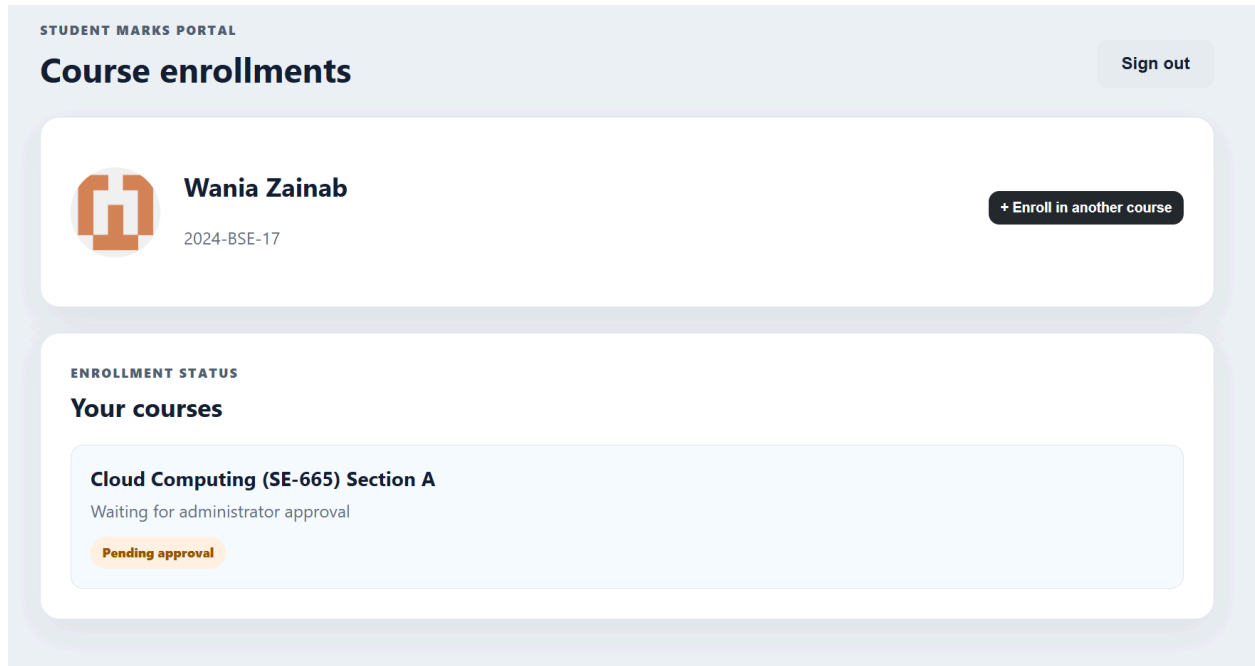

To check my lab's grading I opened the student marks portal.

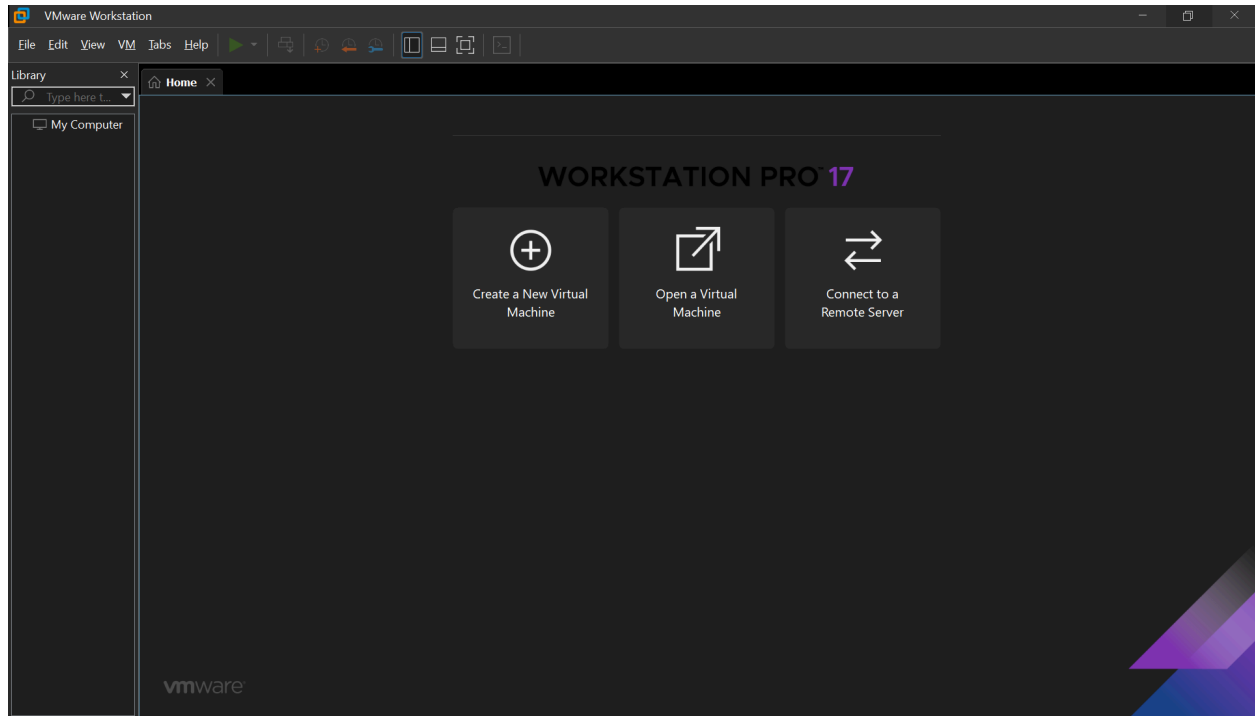

portal_github_profile.png

Here, I connected the Student Marks Portal with my Github profile.
portal_enrollment_submitted.png

Then, I enrolled in a Cloud Computing course offered by my university.
vmware_workstation.png

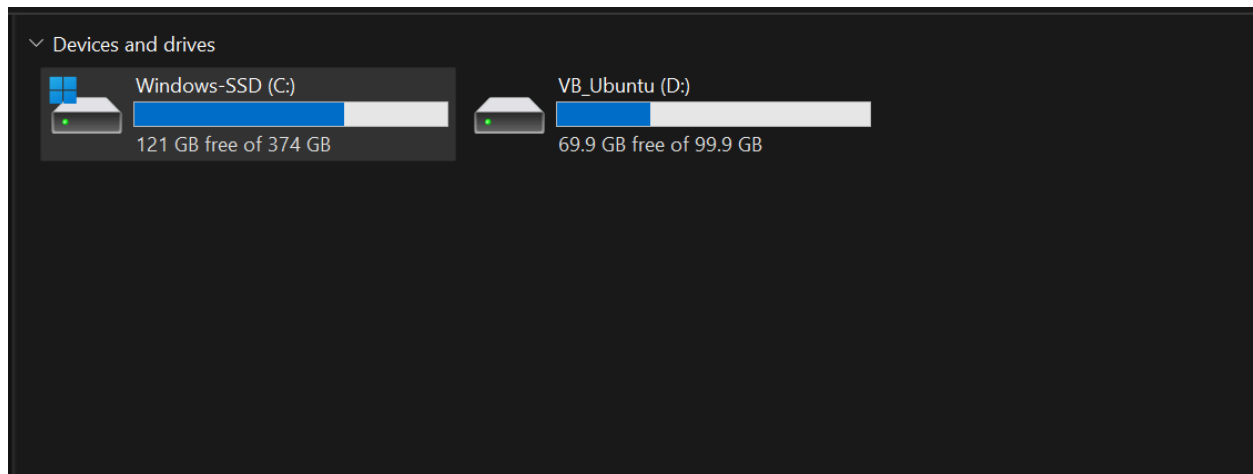

I installed VMware through the Broadcom Website and opened the software.
ubuntu_server_iso.png

Name	Date modified	Type	Size
▼ Today			
 ubuntu-26.04.1-live-server-amd64.iso	9/14/2026 9:01 PM	Disc Image File	2,859,240 KB
 VMware-workstation-full-17.6.4-24832109.exe	9/14/2026 6:38 PM	Application	415,456 KB

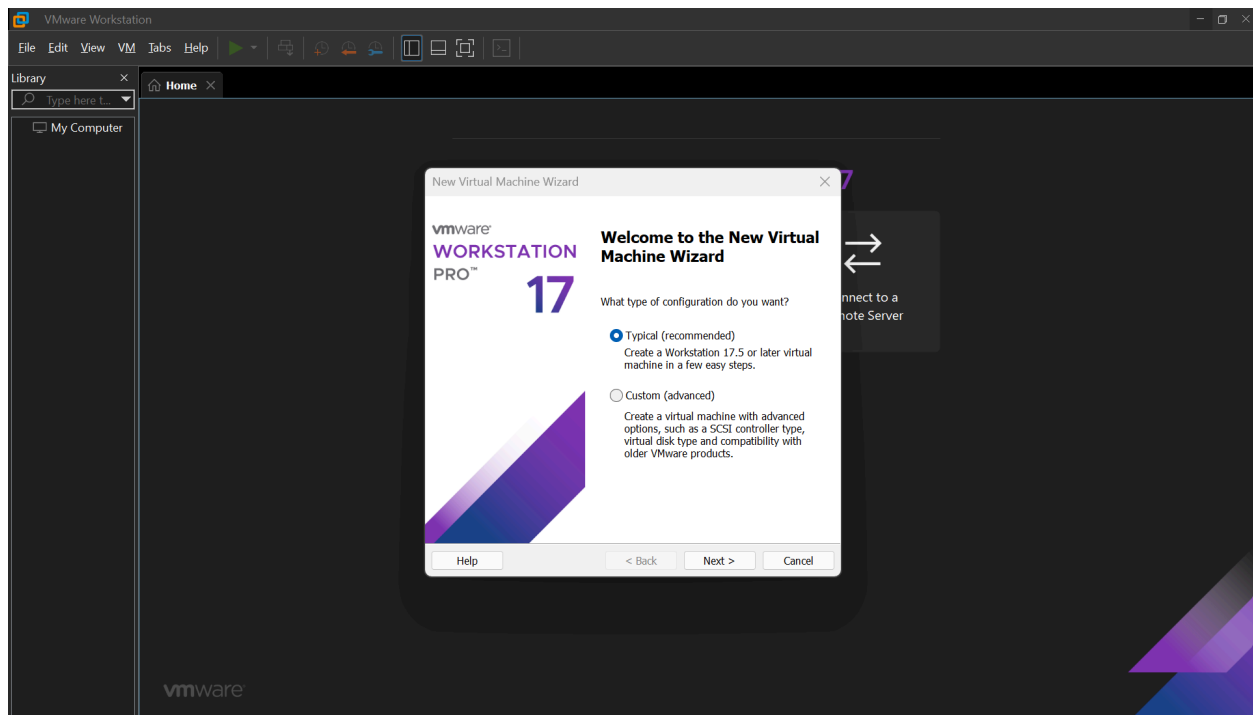

Then I installed the latest version of Ubuntu with iso.

available_storage.png

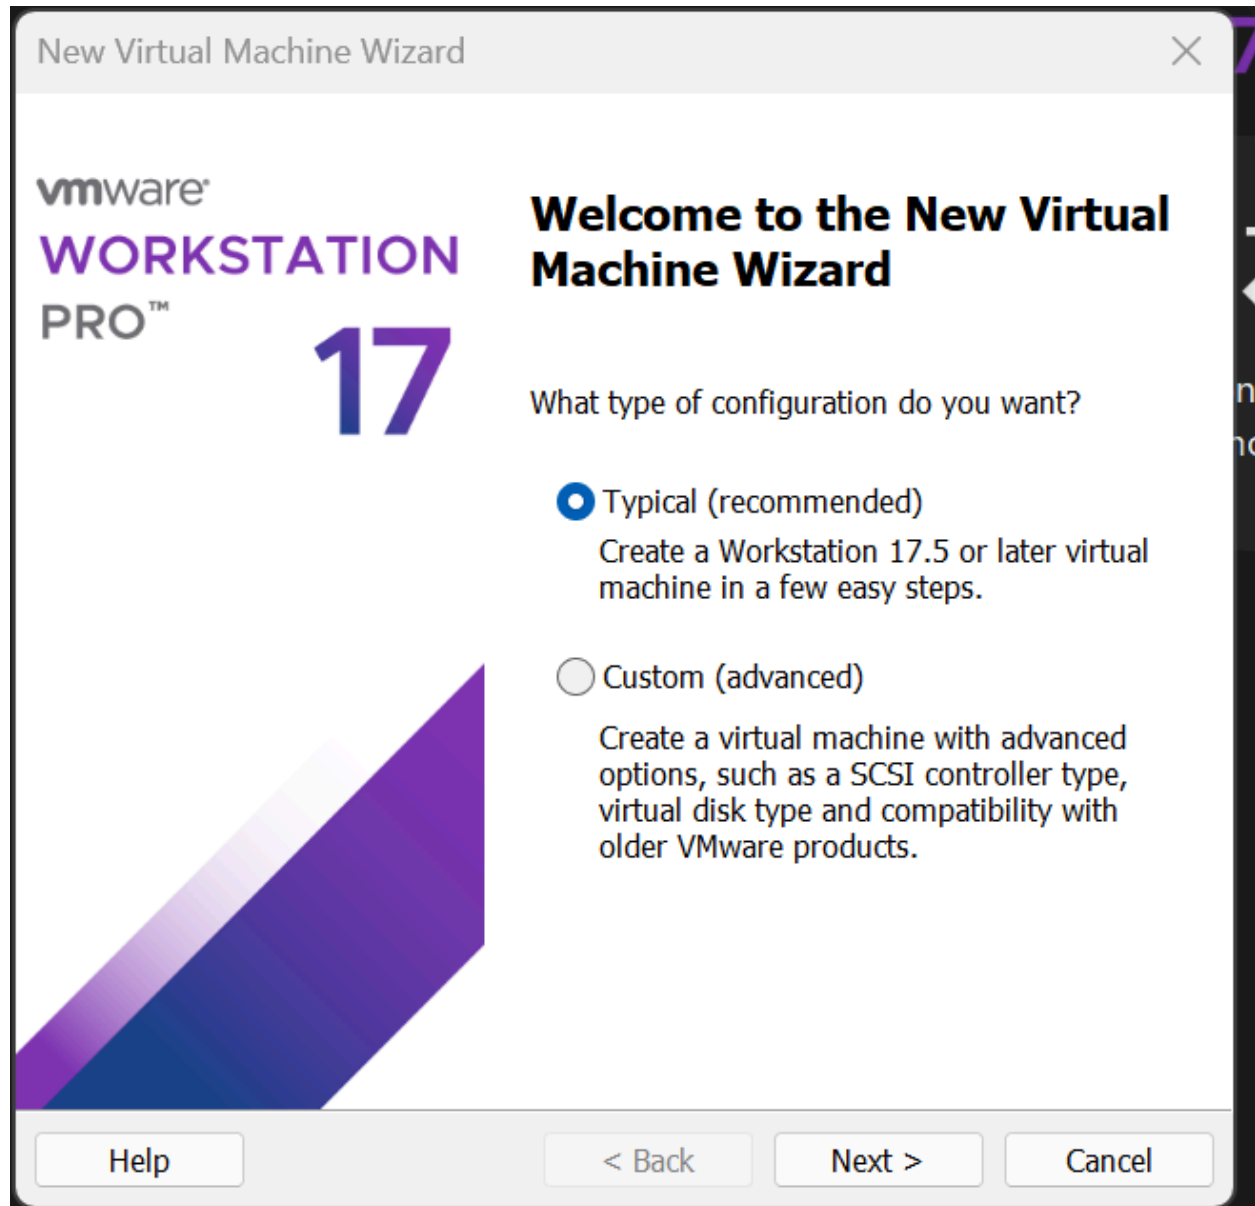

Here I have shown that my system has enough storage to run the software efficiently.

vm_creation_wizard.png

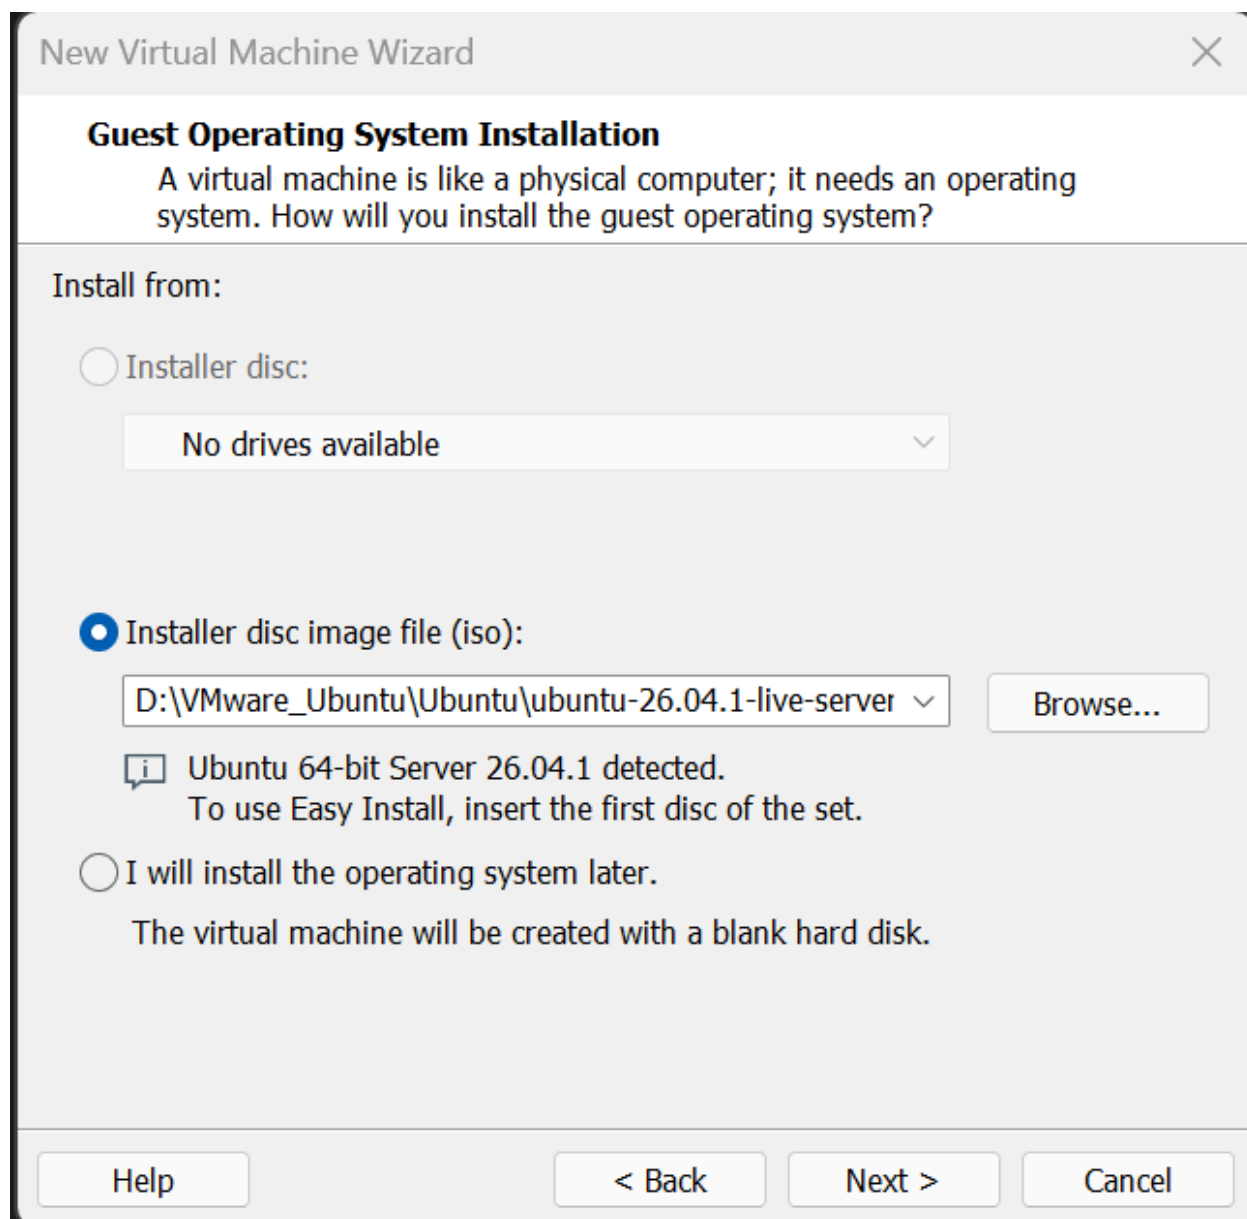

The screenshot shows that I just tapped on Create a New Virtual Machine.

vm_typical_configuration.png

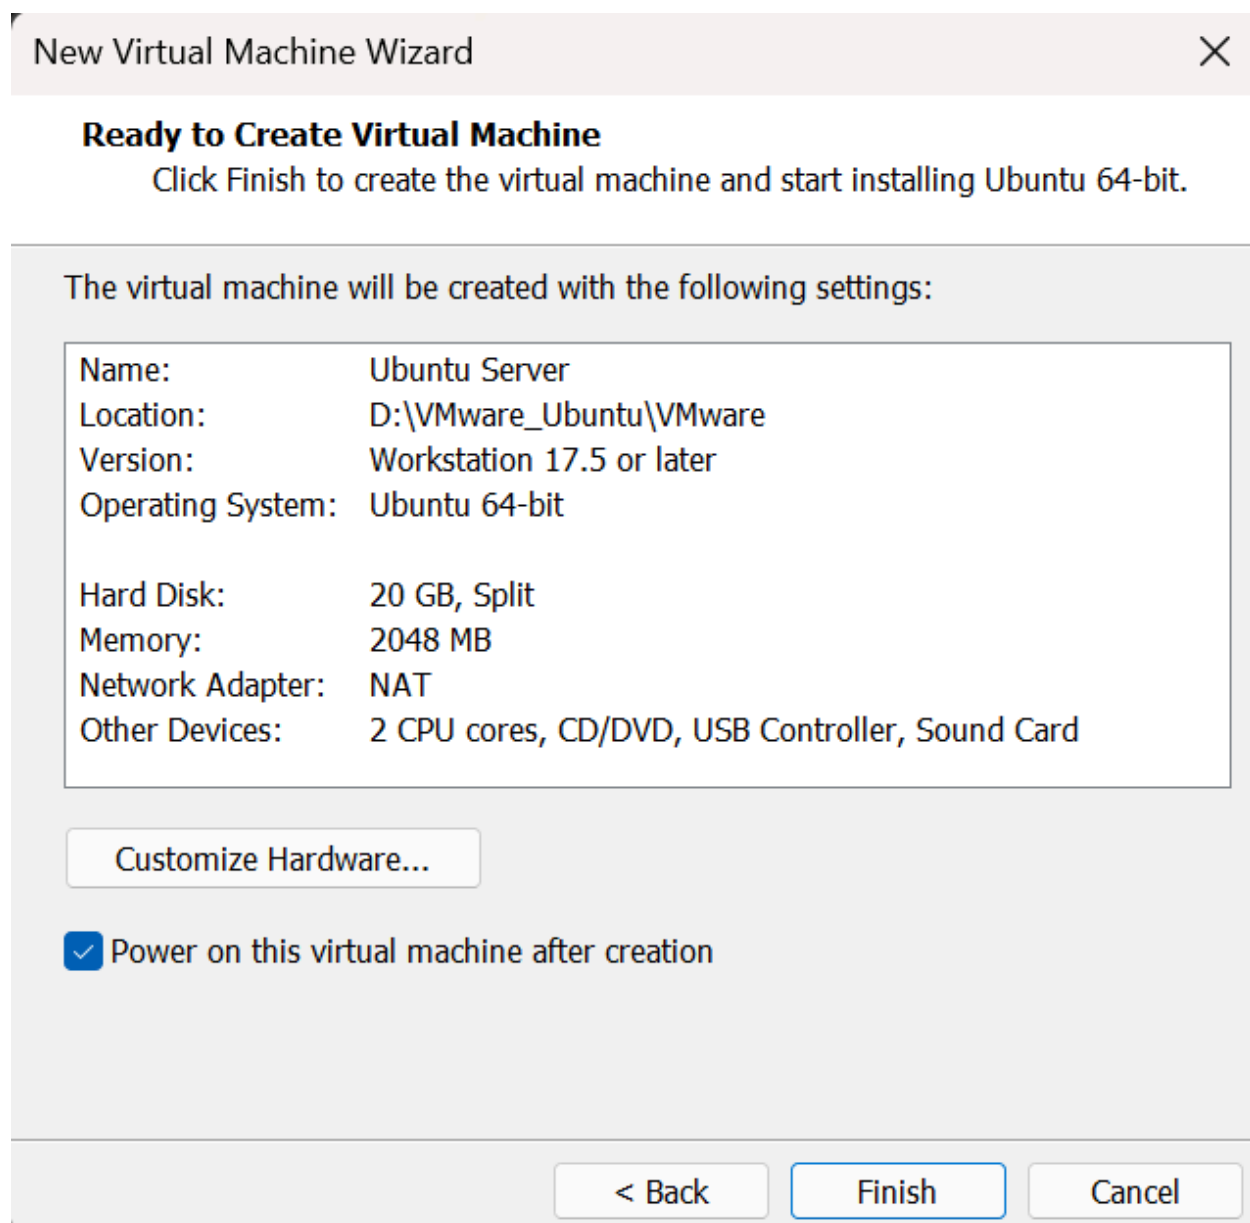

By following the requirements of the lab I selected the typical option.

vm_ubuntu_iso_selected.png

Afterwards, I attached my Ubuntu to the VMware Workstation by giving it the path of iso.

vm_configuration_summary.png

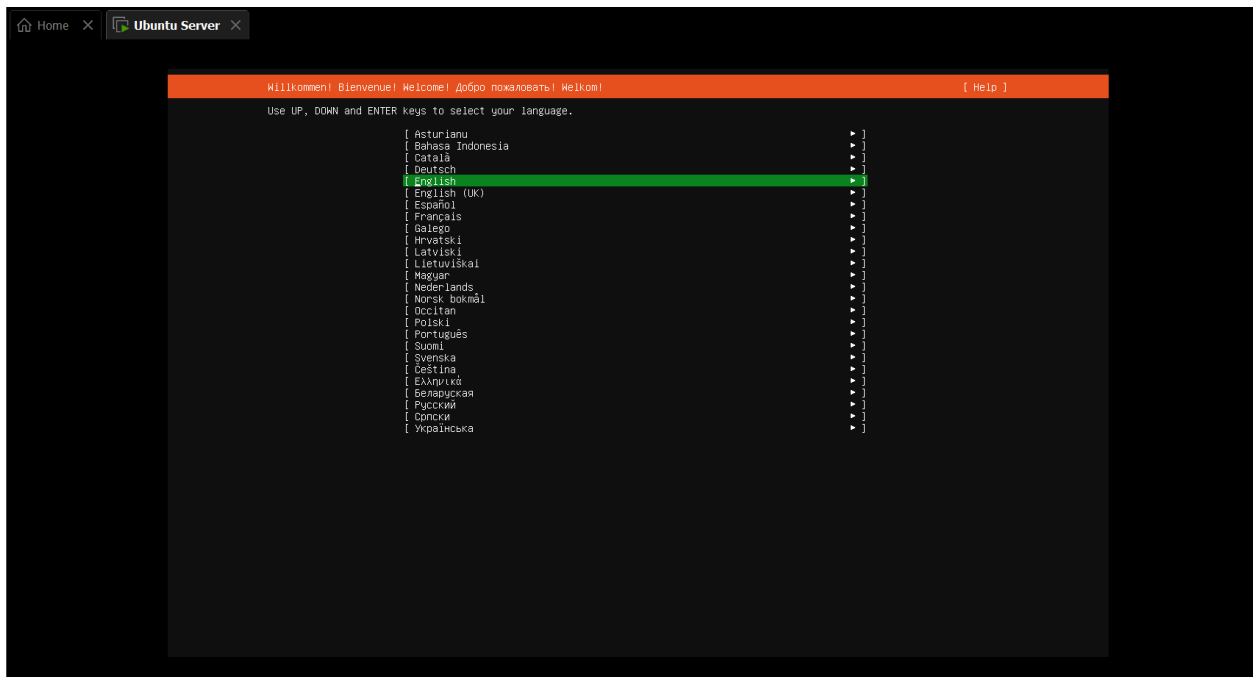

The screenshot demonstrates that I've allotted 20GB to my Virtual machine.

ubuntu_installer_boot.png

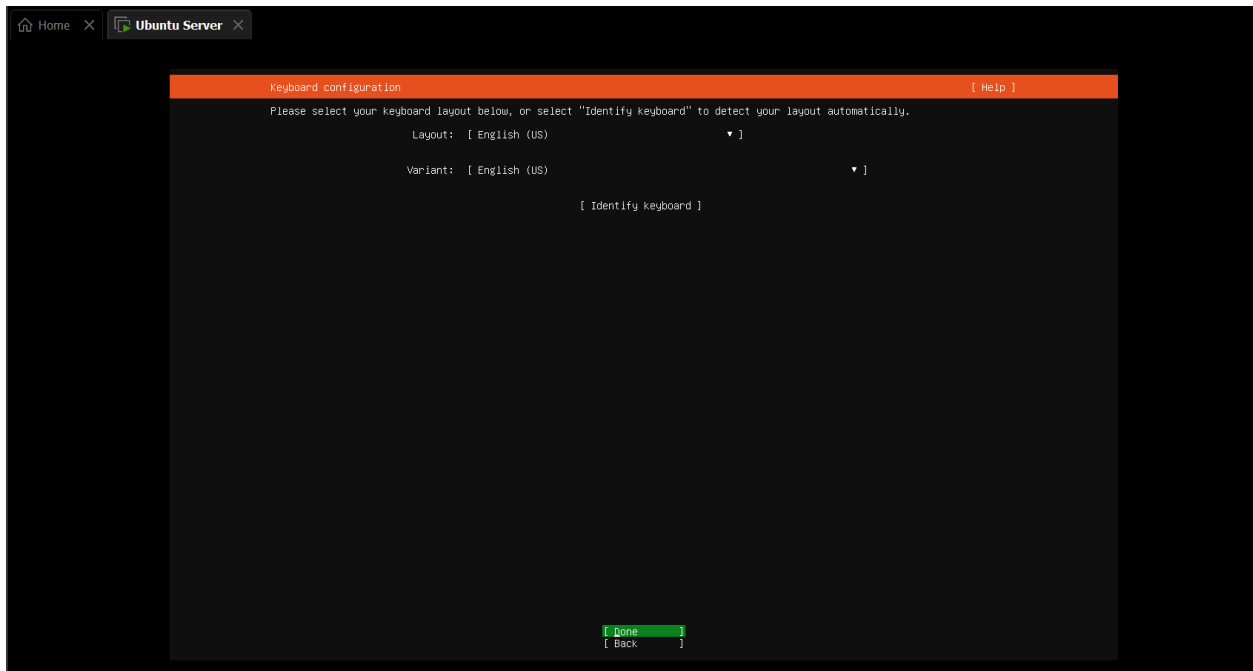

After successfully creating the machine, the system started booting up.

ubuntu_language.png

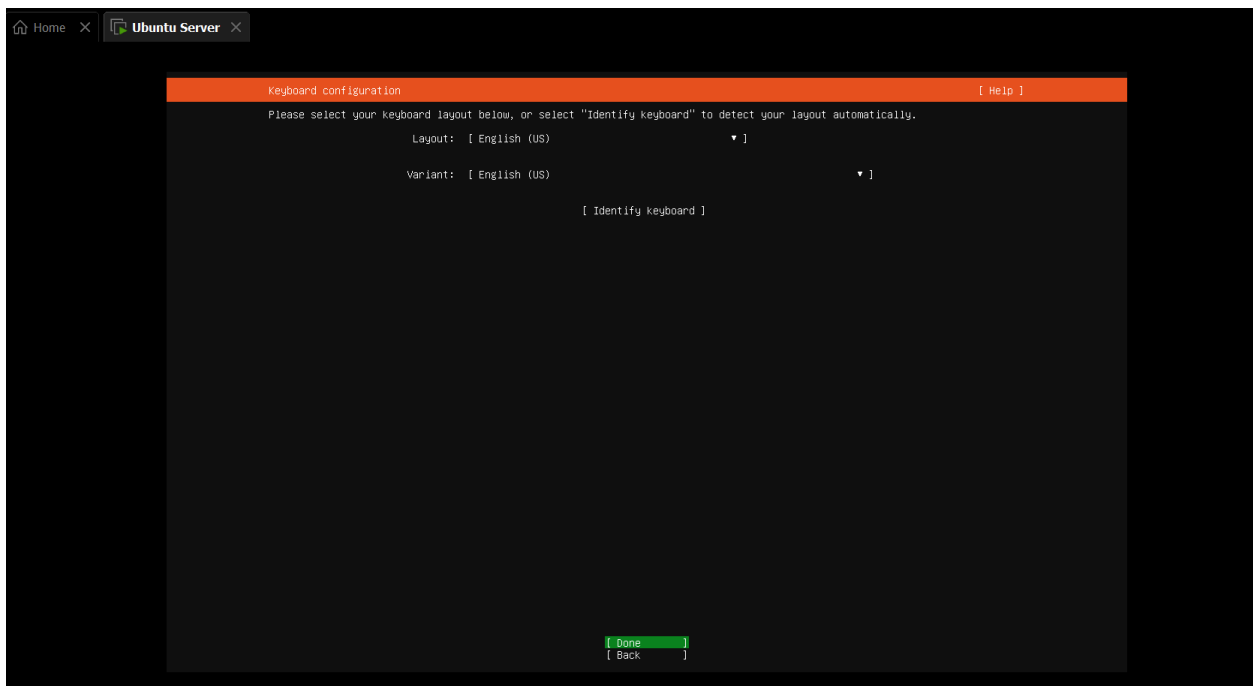

Here I selected English as the machine language, so I can work easily.

ubuntu_keyboard_layout.png

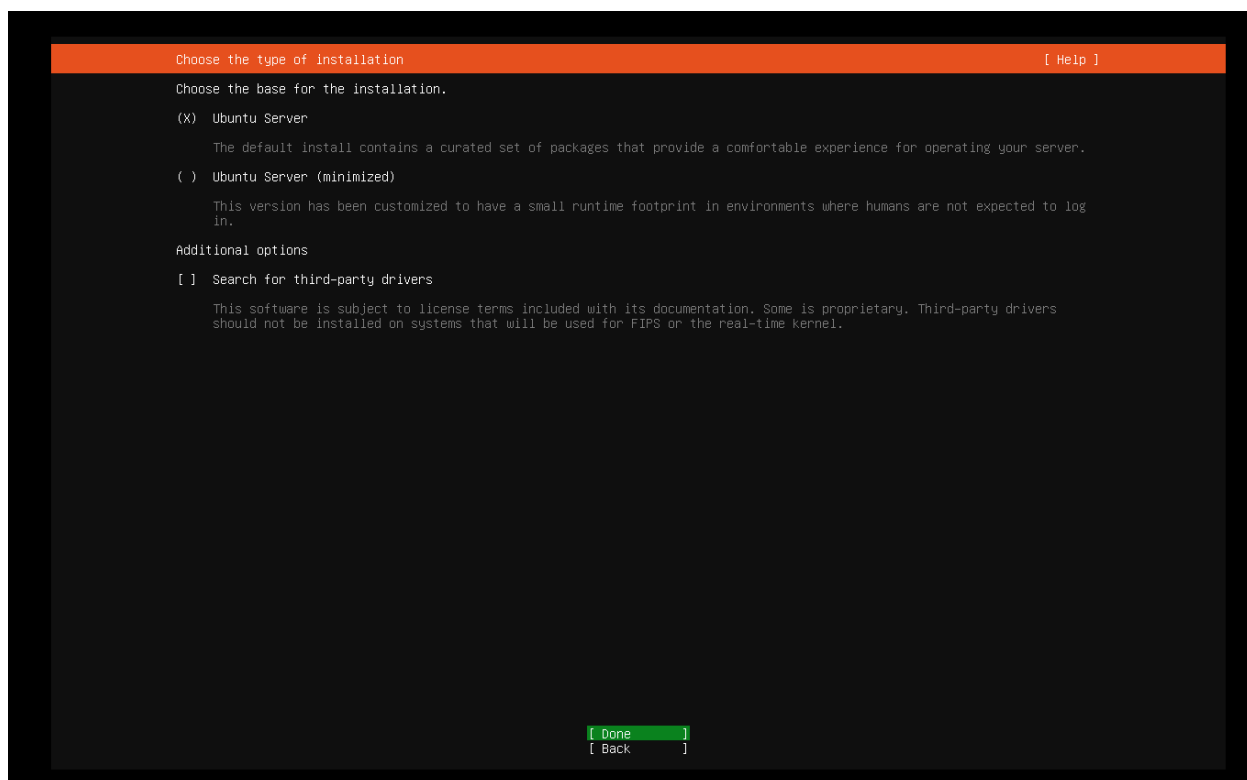

The picture shows the layout of the keyboard as US English.

ubuntu_keyboard_variant.png

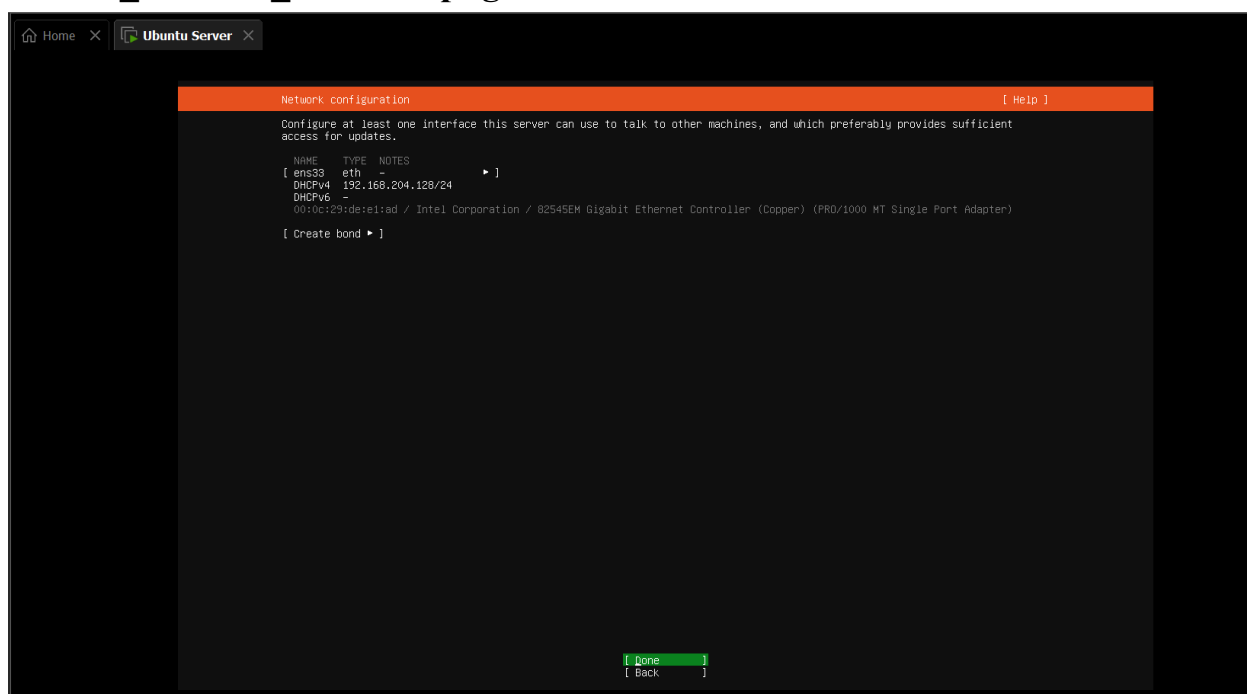

This picture shows the variant of the keyboard as US English.

ubuntu_installation_type.png

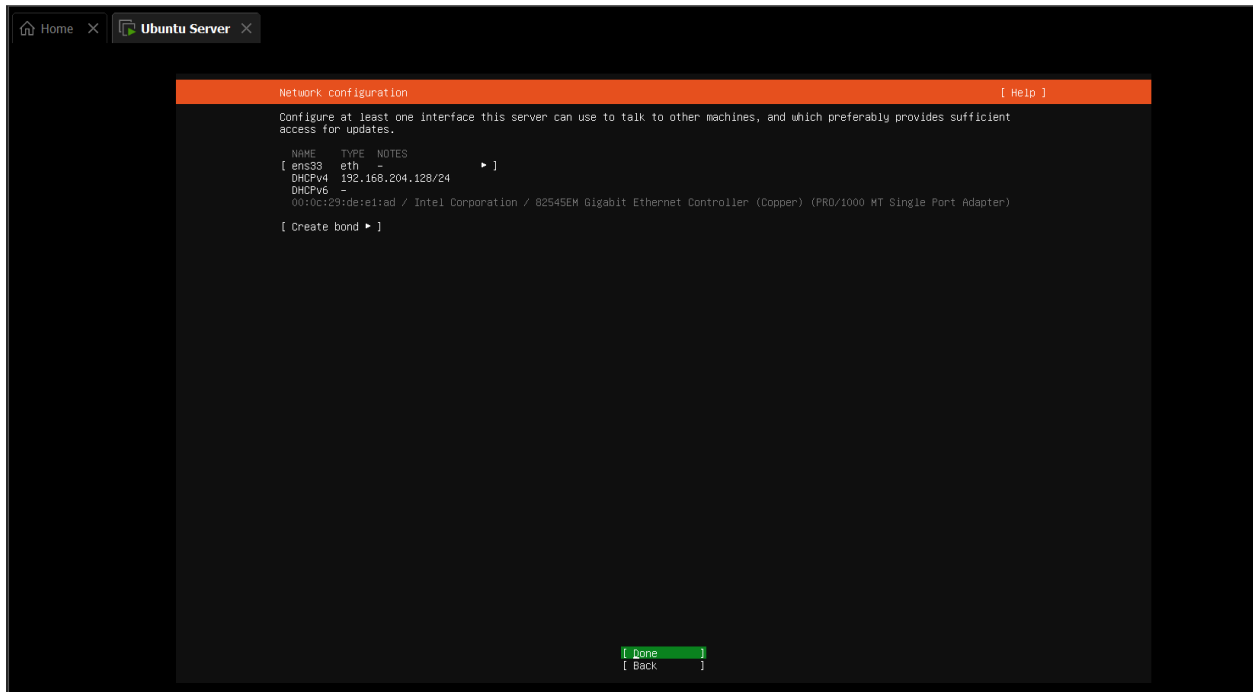

I named my server as Ubuntu server and by default Ubuntu Server was selected for the base for the installation.

ubuntu_network_interface.png

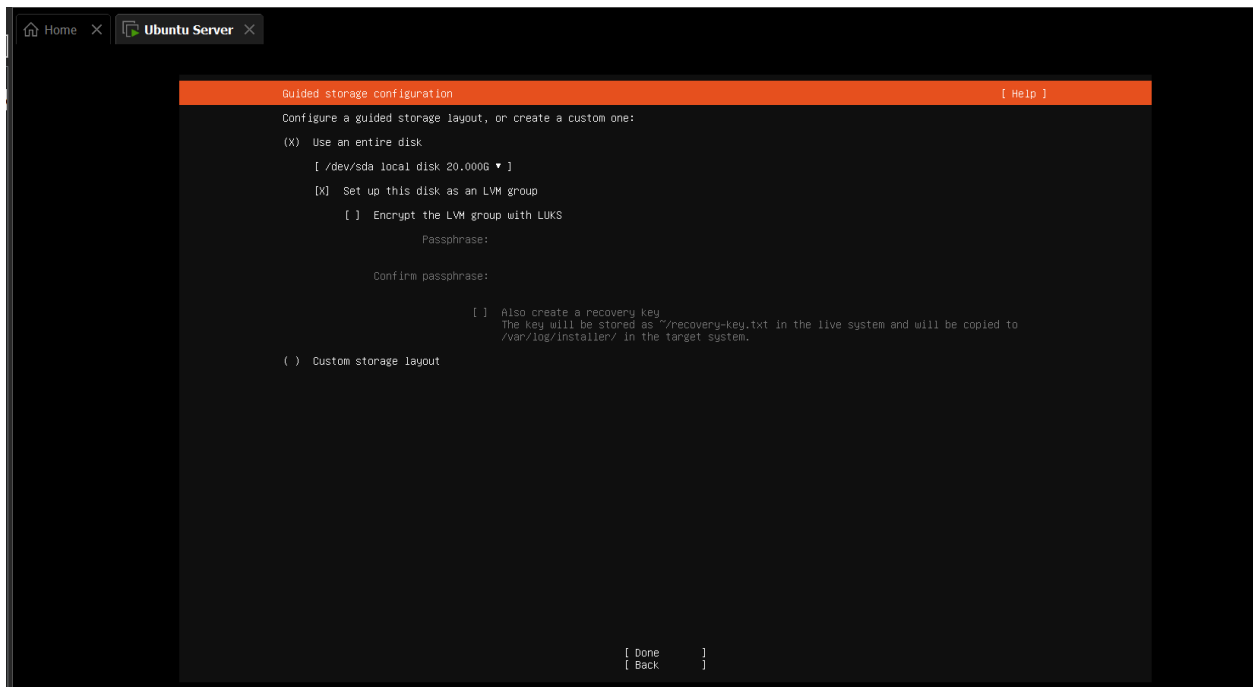

The image shows that my machine is using DHCPv4 with an IP address and also provided a network Interface Card name.

ubuntu_installer_network.png

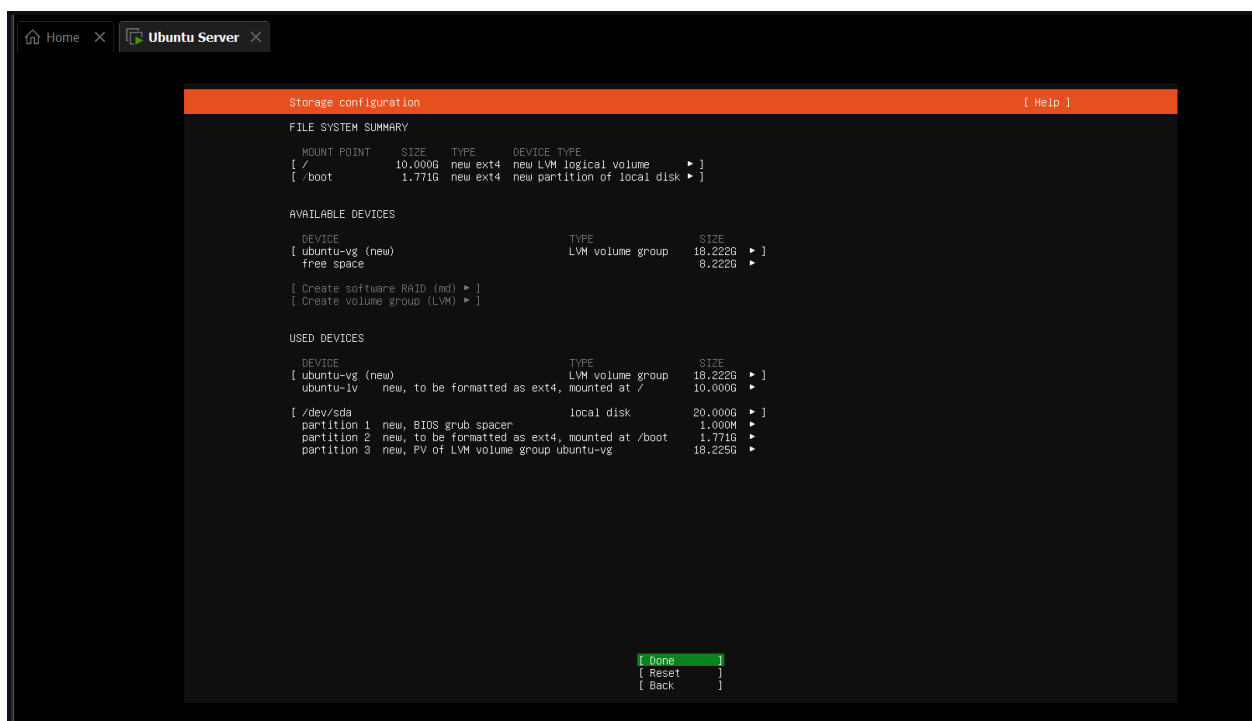

Following the previous screenshot I proceeded with the “Done” option.

ubuntu_guided_storage.png

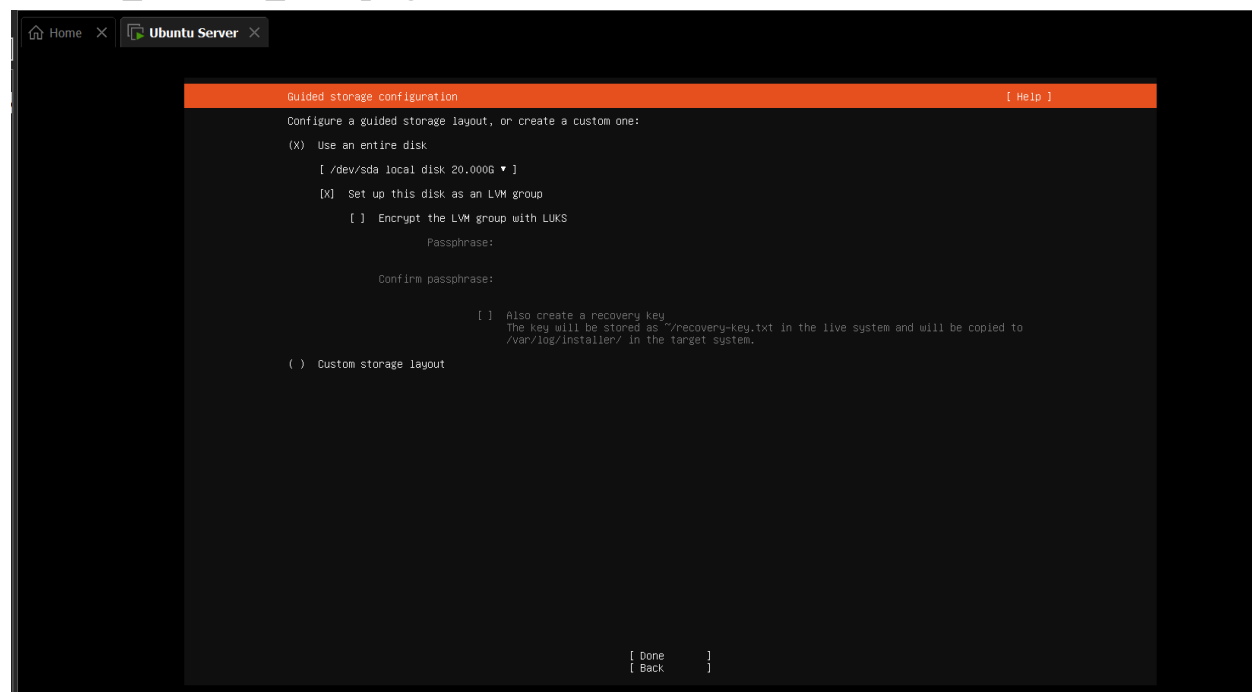

These are the storage options for Ubuntu in VMware.

Ubuntu_storage_configuration.png

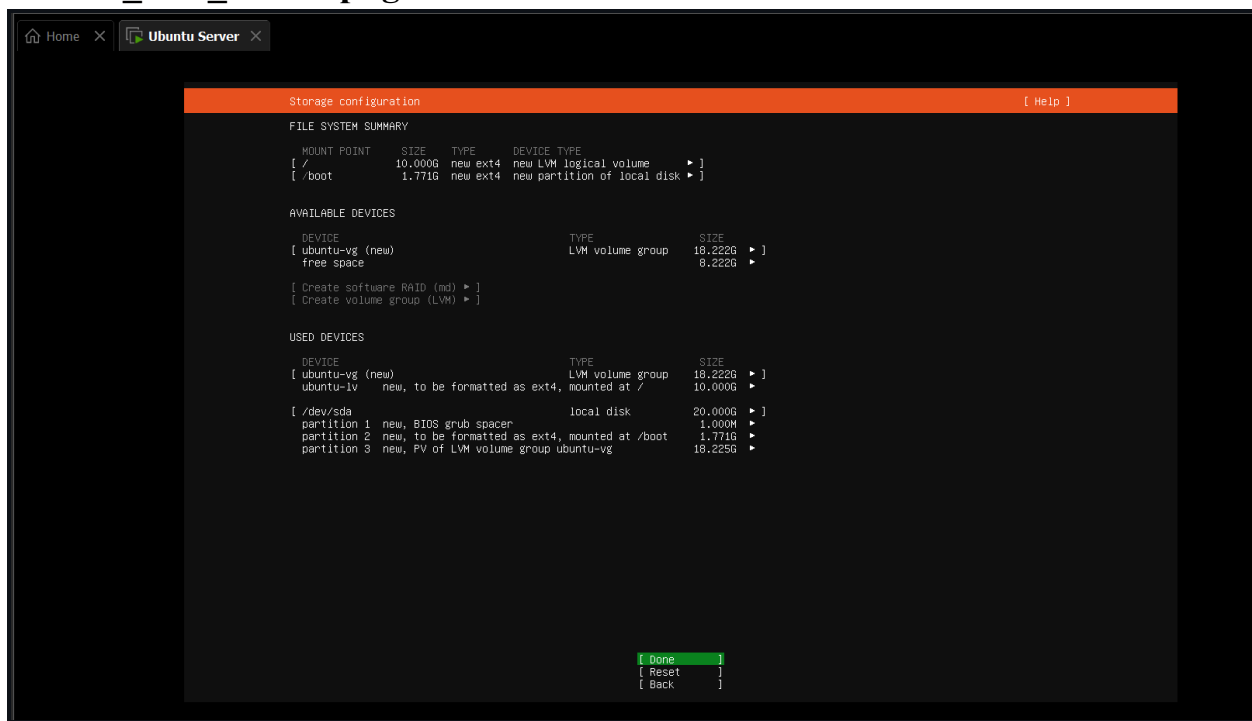

It is the storage configuration screenshot.

ubuntu_selected_disk.png

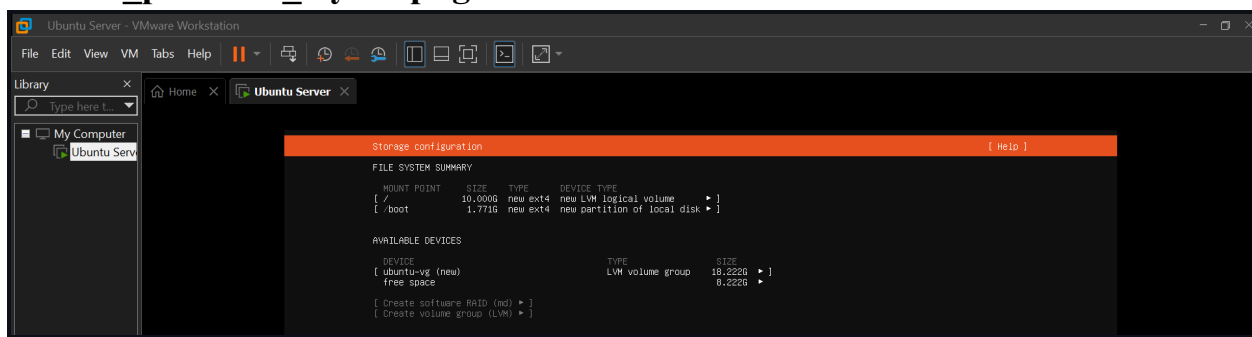

It is the selected disk screenshot.

ubuntu_disk_details.png

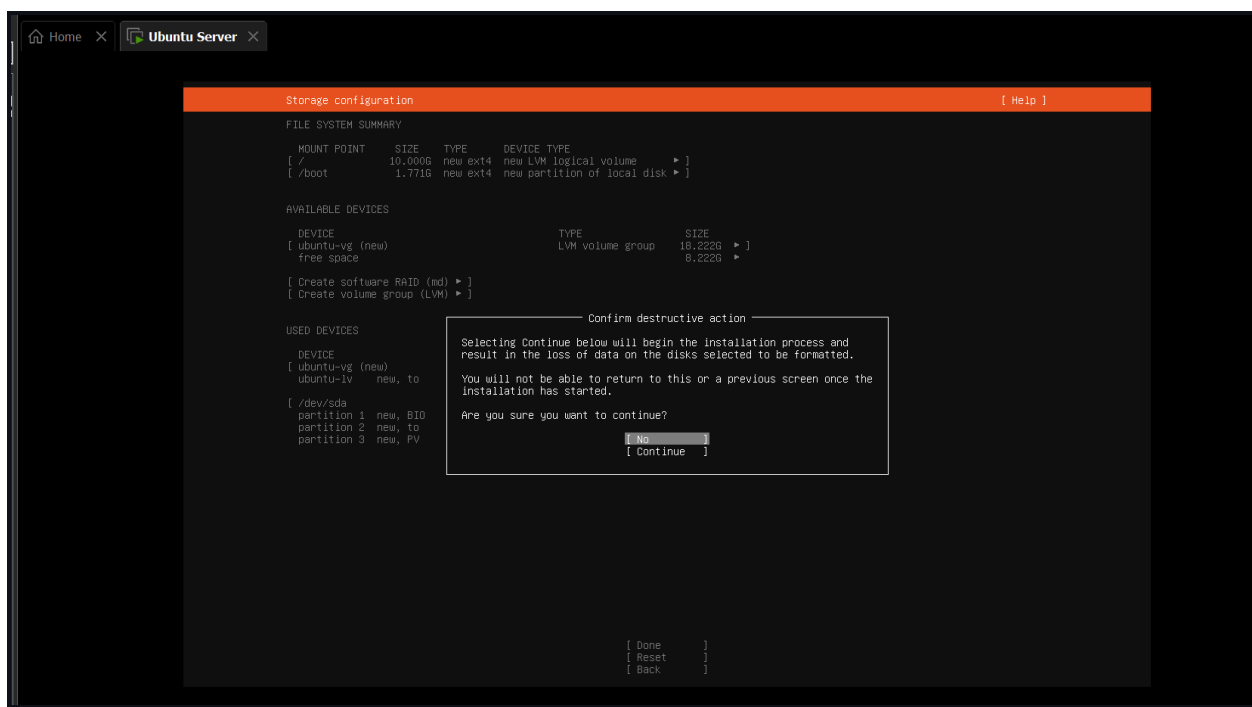

This screenshot shows the details of the disk selected.

ubuntu_partition_layout.png

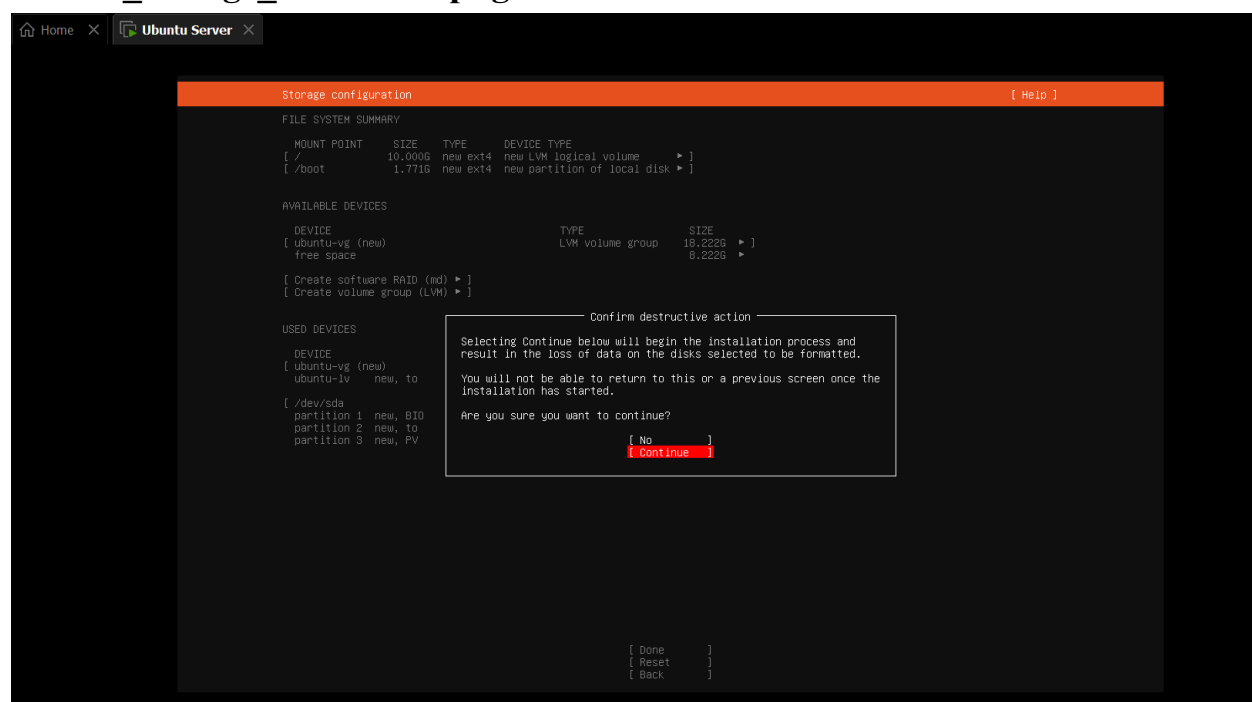

This screenshot shows Ubuntu partitioning.

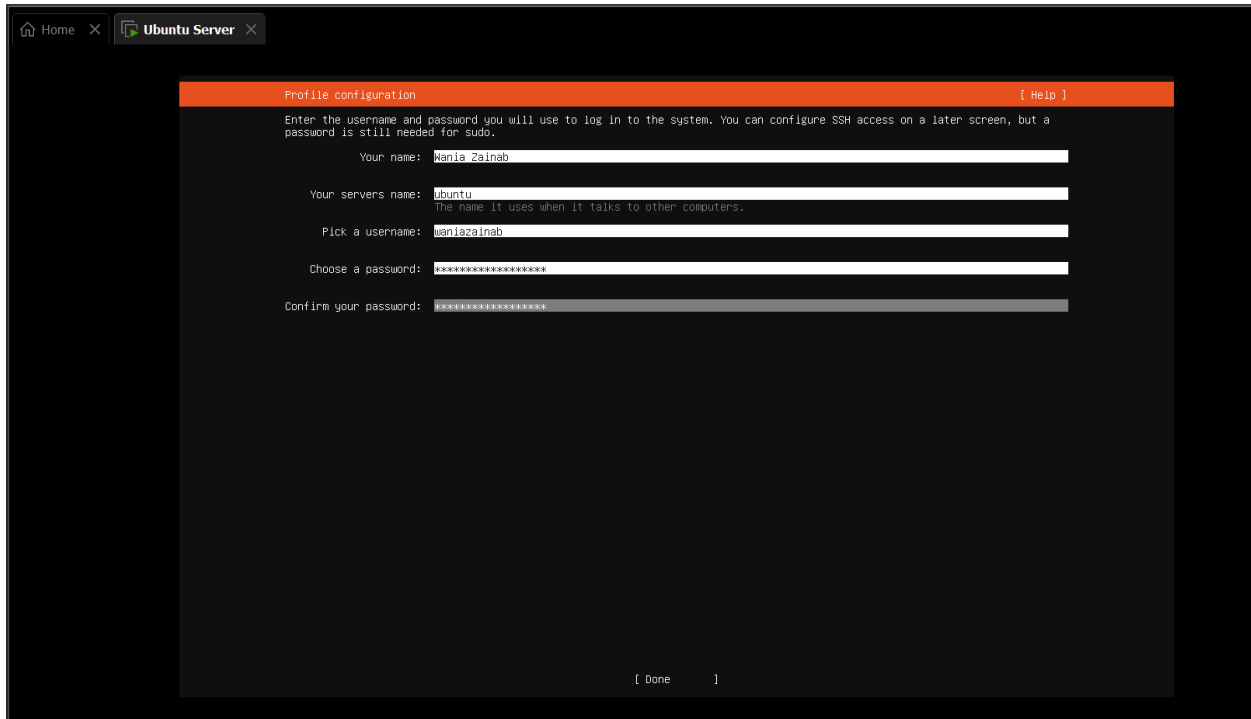

ubuntu_storage_warning.png

This screenshot shows that the installation can damage my disk data if provided the wrong path.
ubuntu_storage_confirmed.png

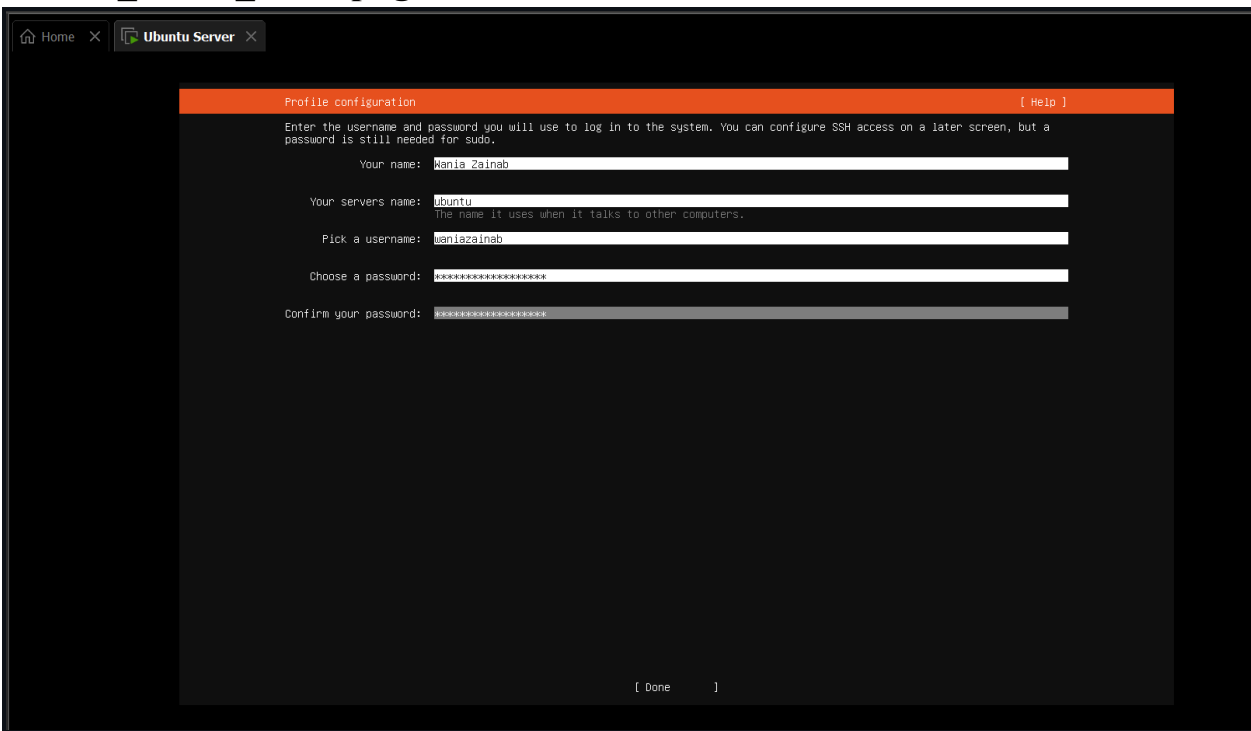

This picture shows that I pressed the continue forward with installation.
ubuntu_actual_name.png

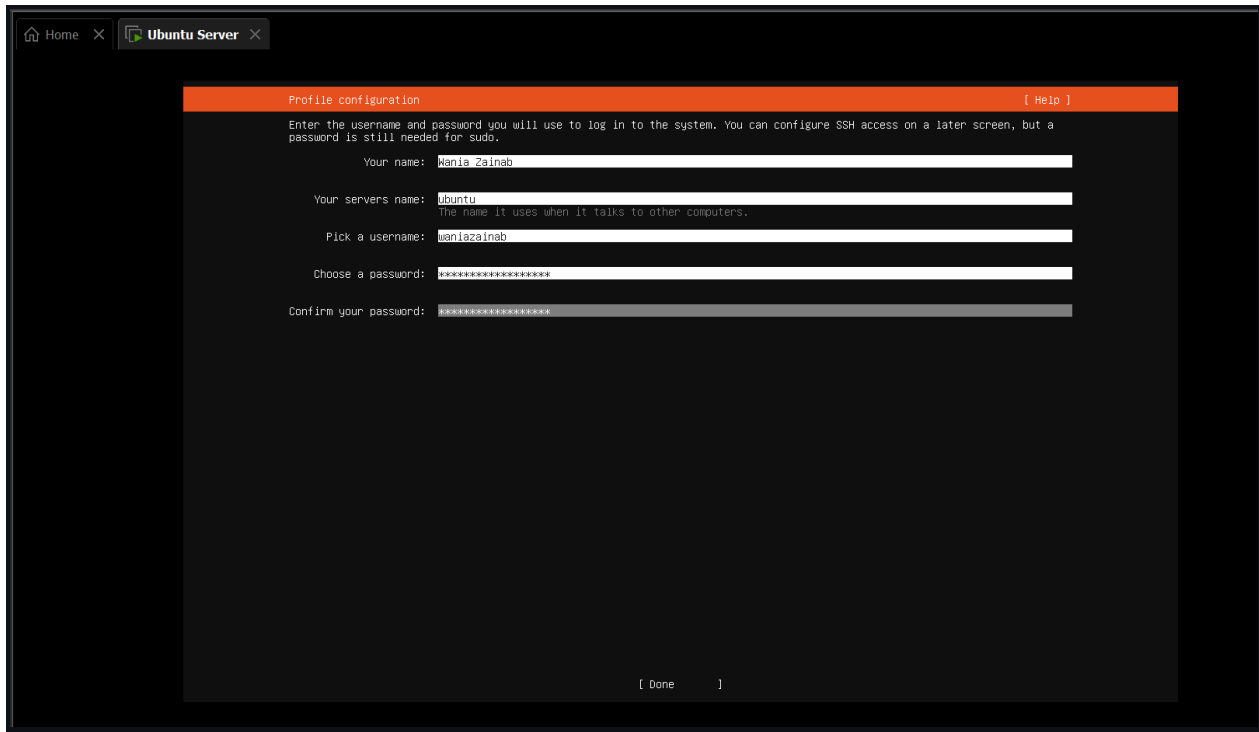

Here i named Ubuntu as “Wania Zainab” as per the [READ.ME](#) requirements.

ubuntu_server_name.png

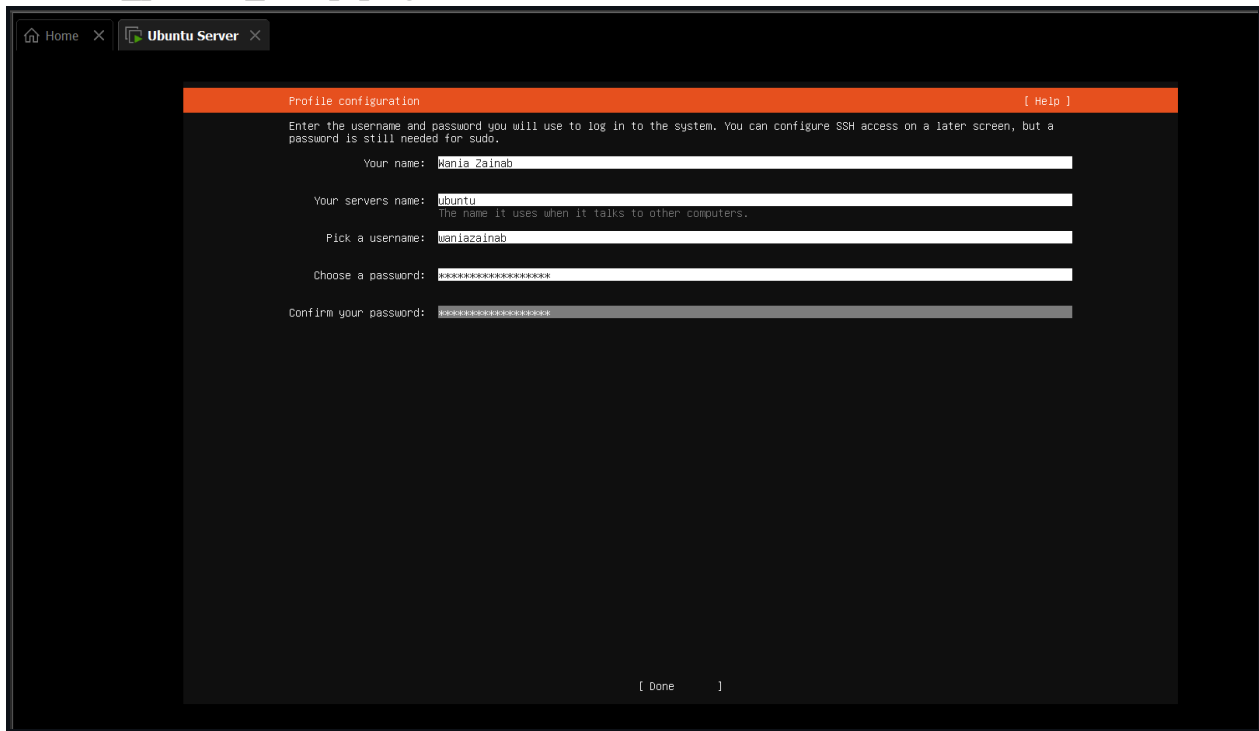

Then, I set up my server name as “Ubuntu”.

ubuntu_username.png

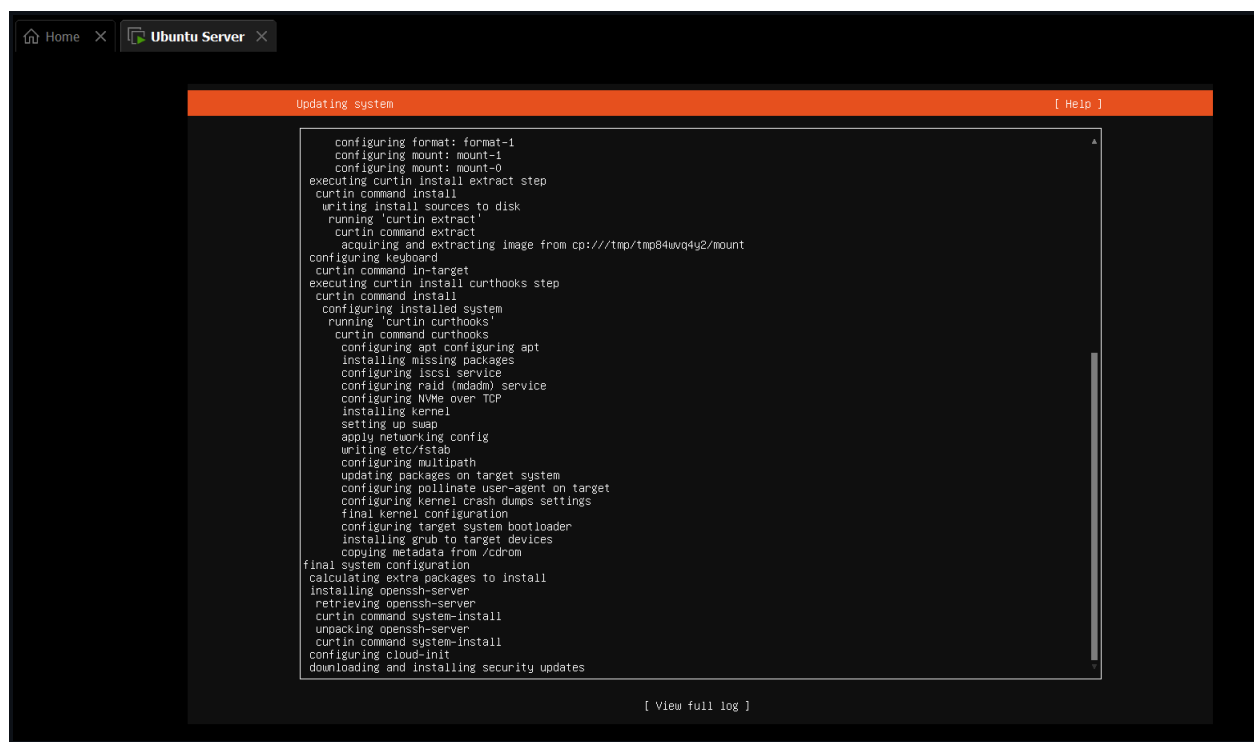

Proceeding with the same page i picked up my username as “waniazainab” , the same username I chose for my github profile.

ubuntu_profile_setup.png

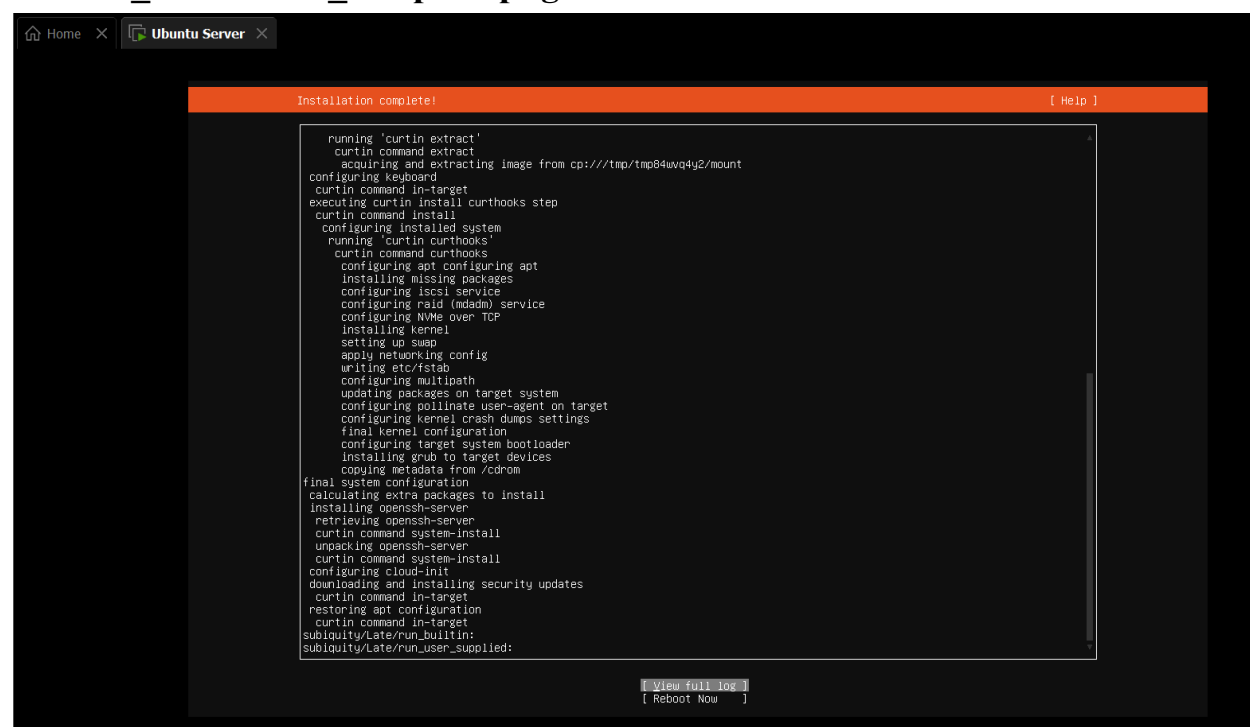

Setting up my password and completing the profile setup by marking on the “Done” button.

ubuntu_installation_progress.png

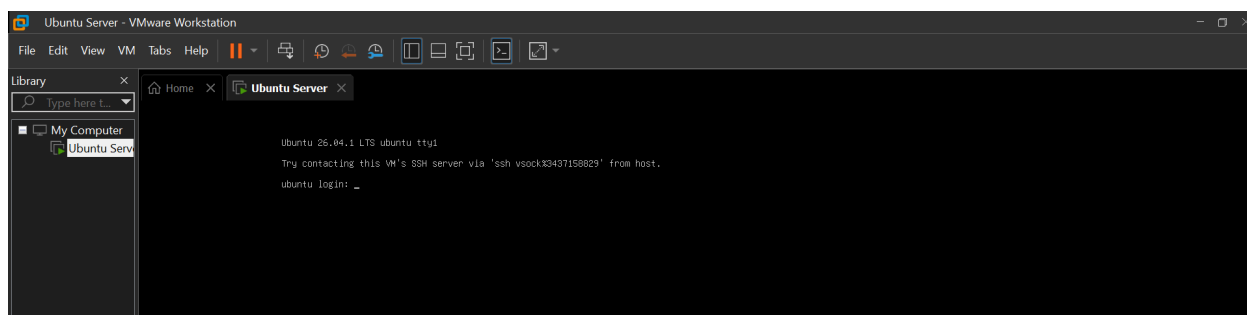

Here VMware workstation started installing Ubuntu.

Ubuntu_installation_complete.png

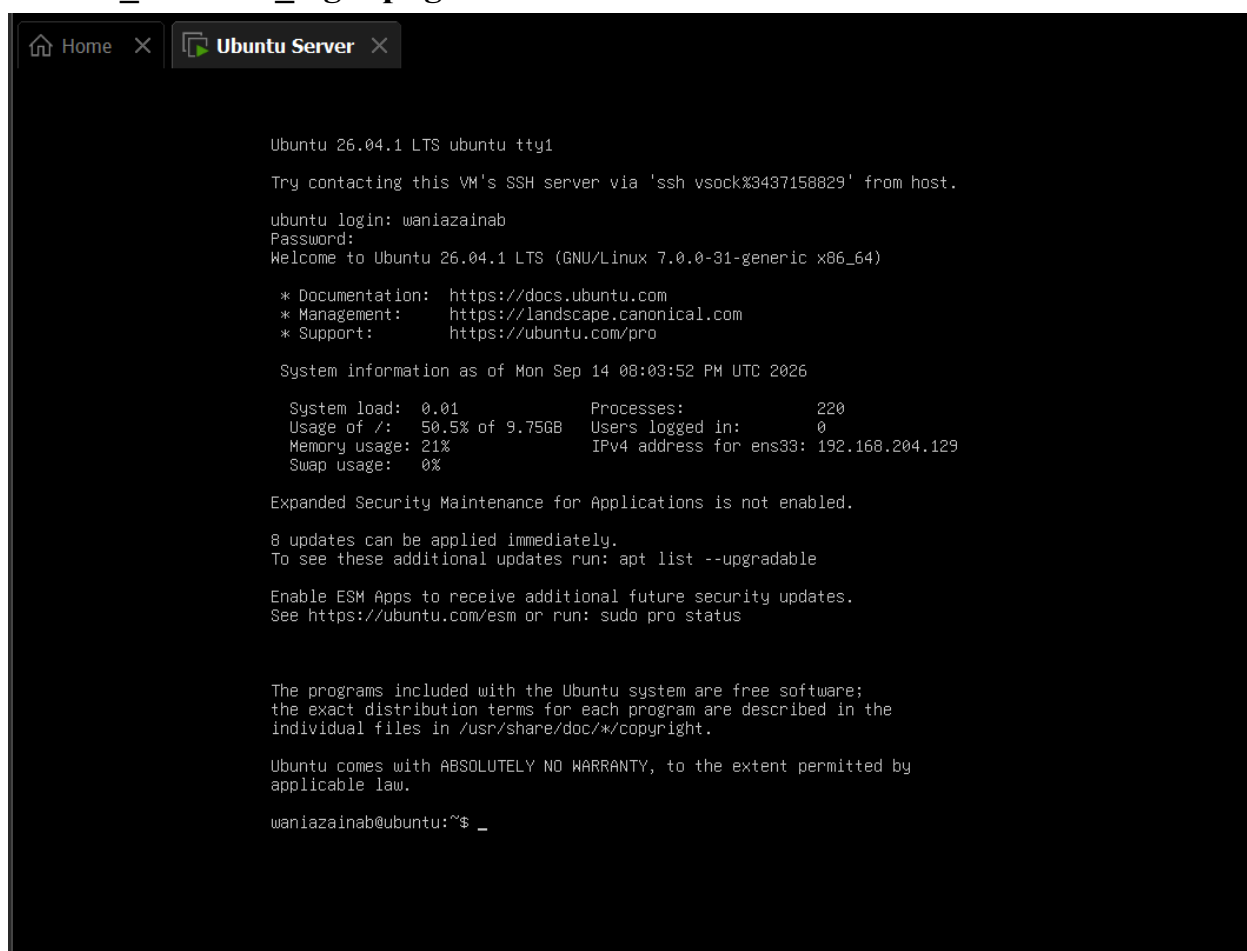

The installation process is completed now.

ubuntu_login_screen.png

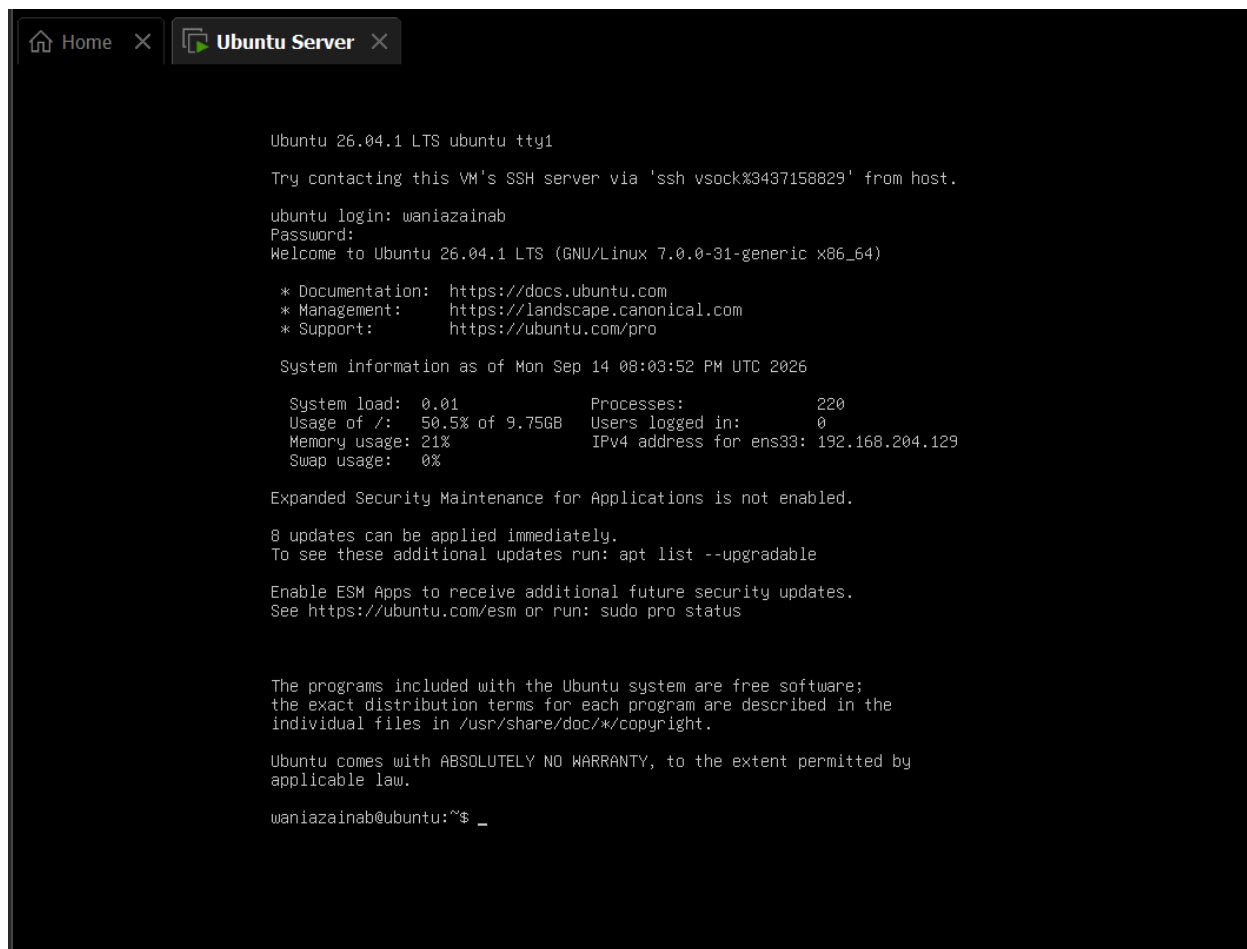

Here I login to Ubuntu with the same credentials.

ubuntu_terminal_login.png

This shows that I successfully logged into Ubuntu.

ubuntu_identity_verified.png

```
Ubuntu 26.04.1 LTS ubuntu tty1

        valid_lft forever preferred_lft forever
waniazainab@ubuntu:~$

```

Then, it showed the relevant details of my IP address.

windows_ssh_command.png

```

Microsoft Windows [Version 10.0.26100.9445]
(c) Microsoft Corporation. All rights reserved.

C:\Users\User>ssh waniazainab@192.168.204.129

```

During installation I selected Yes to install SSH. So, here I opened my Command Prompt in Windows and checked whether it's working or not.

windows_ssh_fingerprint.png

```

Command Prompt - ssh wani  X + v
Microsoft Windows [Version 10.0.26100.9445]
(c) Microsoft Corporation. All rights reserved.

C:\Users\User>ssh waniazainab@192.168.204.129
The authenticity of host '192.168.204.129 (192.168.204.129)' can't be established.
ED25519 key fingerprint is SHA256:nppVB5YL0iOAq5UIxI6fLs/buR2qtuV8GVbSVMoMt90.
This key is not known by any other names.
Are you sure you want to continue connecting (yes/no/[fingerprint])? yes

```

It asked me whether to connect and I accepted the connection.

windows_ssh_login.png

```

vaniazainab@ubuntu: ~ X + v
